## Objectives

As Thailand and its neighboring countries are going into their industrial development phase, the demand for engineers has been escalating. Responding to this need, the Faculty of Engineering of KU created its International Undergraduate Program (IUP) in 2003 with the aim of producing professional engineers not only with technical knowledge and skills but also with English communication skills who could readily fill in that growing need. To date, we have already produced more than 500 graduates since our establishment and now, we have over 600 students enrolled in our programs.
