

Dormitory Safety Standards for Students

Ensuring the safety and well-being of students is a top priority in our dormitory. We have implemented strict security measures to provide a safe and comfortable living environment. Our key safety features include:

1. Keycard Access System

To prevent unauthorized entry, our dormitory is equipped with a keycard access system. Only registered students and authorized personnel can enter the building, ensuring security and privacy for all residents.

2. 24/7 Security Personnel

Trained security officers are stationed at the dormitory around the clock to monitor the premises and assist students whenever needed. Their presence enhances safety and provides immediate response to any security concerns.

3. CCTV Surveillance

Security cameras are installed throughout the dormitory, including common areas and entry points. These cameras help deter crime and ensure a secure environment by continuously monitoring activities within the premises.

4. Emergency Alert System and Contact Channels

For the safety of all residents, our dormitory is equipped with an emergency alert system to notify students in case of any potential threats or hazards. Additionally, students have access to emergency contact channels, allowing them to quickly reach security personnel or dormitory staff when needed.

With these safety measures in place, we strive to create a secure and supportive environment where students can focus on their studies with peace of mind.
