BIO SCI

KASETSART UNIVERSITY
SCIENCE

“Empowered by four leading faculties and certified by ASEAN University Network-Quality Assurance (AUN-QA), this interdisciplinary program merges biology with data science to drive innovation and shape global leaders in sciences, agriculture, agro-industry, and fisheries.”

BIOSCIENCE AND TECHNOLOGY

INTERNATIONAL UNDERGRADUATE PROGRAM

- **Build a foundation** in modern science and essential skills
- **Explore biology** from plants and animals to microbes and molecules, with focus areas in botany, zoology, microbiology, genetics, and biotechnology
- **Gain hands-on experience** through research projects and practicums in universities, industries, and organizations
- **Access opportunities for funding** to support overseas activities
- **Learn with experts across various fields:** Agriculture, Agro-Industry, Fisheries, and Science
- **Master cutting-edge tools** in DNA & omics, bioinformatics, molecular techniques, and computational biology through laboratory training
- **Drive sustainability** by applying bioscience to agriculture, fisheries, and agro-industry, contributing to global solutions
- **Shape your future with careers** in bioscience, biotechnology, biomedical and environmental sciences, bioinformatics, education, communication, and industry — or advance to Master’s studies in specialized bioscience fields
